And one fateful night, he does. When the creature opens his eyes, the doctor is repulsed: his vision of perfection is, in fact, a hideous monster. Dr. Frankenstein abandons his creation, but the monster won't be ignored, setting in motion a chain of violence and terror that shadows Victor to his death. Mary Shelley's Frankenstein, a gripping story about the ethics of creation and the consequences of trauma, is one of the most influential Gothic novels in British literature. It is as relevant today as it is haunting.

Atticus Finch gives this advice to his children as he defends the real mockingbird of this classic novel - a black man charged with attacking a white girl. Through the eyes of Scout and Jem Finch, Lee explores the issues of race and class in the Deep South of the 1930s with compassion and humour. She also creates one of the great heroes of literature in their father, whose lone struggle for justice pricks the conscience of a town steeped in prejudice and hypocrisy.

**Assignments across the Curriculum** Dan Melzer 2014-08-15 In Assignments across the Curriculum, Dan Melzer analyzes the rhetorical features and genres of writing assignments through the writing-to-learn and writing-in-the-disciplines perspectives. Presenting the results of his study of 2,101 writing assignments from undergraduate courses in the natural sciences, social sciences, business, and humanities in 100 postsecondary institutions in the United States, Assignments across the Curriculum is unique in its cross-institutional breadth and its focus on writing assignments. The results provide a panoramic view of college writing in the United States. Melzer's framework begins with the rhetorical situations of the assignments—the purposes and audiences—and broadens to include the assignments' genres and discourse community contexts. Among his conclusions is that courses connected to a writing-across-the-curriculum (WAC) initiative ask students to write more often, in a greater variety of genres, and for a greater variety of purposes and audiences than non-WAC courses do, making a compelling case for the influence of the WAC movement. Melzer's work also reveals patterns in the rhetorical situations, genres, and discourse communities of college writing in the United States. These larger patterns are of interest to WAC practitioners working with faculty across disciplines, to writing center coordinators and tutors working with students who bring assignments from a variety of fields, to composition program administrators, to first-year writing instructors interested in preparing students for college writing, and to high school teachers attempting to bridge the gap between high school and college writing.

**Teaching and Learning in the Intermediate Multiage Classroom** Alice Leeds 2002-06-11 Teaching and Learning in the Intermediate Multiage Classroom describes in practical detail a creative and effective teaching practice in multiage elementary classrooms, one that integrates challenging academics with personalized teaching and learning. By describing the benefits multiage classrooms provide in terms of personal, social, and academic achievement, plus outlining a process for teachers to become successful in this environment, this book is bound to interest administrators, teachers, and researchers in education.

*Integrated General Education* Catherine M. Wehlburg 2010-04-19 General education has been an essential part of American higher education for a long time. Unfortunately, it is often seen as something to "get out of the way" so that the student can go on to take the more "important" courses within a chosen major. This volume changes that perception. Topics discussed include: Integrated General Education: A Brief Look Back Why are Outcomes So Difficult to Achieve? Making General Education Matter: Structures and Strategies Unifying the Undergraduate Curriculum Through Inquiry-Guided Learning University

of the Pacific's Bookend Seminars on a Good Society Core Curriculum Revision at TCU: How Faculty Created and Are Maintaining the TCU Core Curriculum Creating an Integrative General Education: The Bates Experience Building an Integrated Student Learning Outcomes Assessment for General Education: Three Case Studies Meaningful General Education Assessment That is Integrated and Transformative Institutions of higher education have a responsibility to develop a meaningful general education curriculum that cultivates qualities of thinking, communication, and problem solving (to name a few of the general education goals that many institutions share). What is missing from many institutions, though, is the concept of integrating general education with the overall educational curriculum. If this is done, general education courses are no longer something to take quickly so they can be checked off; instead, they become part of the educational development of the student. This integration benefits the student, certainly, but also the larger society--baccalaureate graduates steeped in the liberal arts will become future leaders. Having been prepared with a broad knowledge base, our current students will be able to think more critically and make good use of information to solve problems that have not yet even been identified. This is the 121st volume of the Jossey-Bass higher education quarterly report series New Directions for Teaching and Learning, which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Its appearance has changed repeatedly as it grew, developed and transformed over the centuries. Seoul is also on record as the world's fastest city to have modernized. And the city's history is undoubtedly recounted the most plainly through its most visible face, its buildings. At the heart of Seoul, buildings constructed during the Joseon Dynasty stand harmoniously with modern and cutting edge structures, offering a unique urban landscape. In this guide, the city of Seoul would like to present to readers throughout the world a selection of about 220 of these traditional, modern and contemporary buildings that were built and developed alongside the city's history. **Beyond the Traditional Essay: Increasing Student Agency in a Diverse Classroom with Nondisposable Assignments** Melissa Ryan 2022-07-12 This volume offers a range of responses to the problem of "disposable assignments," essays written just for a grade and then thrown away. The scholars collected here explore how renewable assignments can contribute to public knowledge, eliciting student work that is shared across networks of learning, that does something, that transcends the teacher's grade. Although there is significant interest in such innovative teaching practices, particularly in this year of pedagogical experimentation, there are few resources for teachers that collect in one place both scholarly context and practical advice for implementing renewable assignments in the classroom. The essays in this volume range widely, from demonstrating how digital tools engage and empower reluctant learners, to raising theoretical questions around intellectual property, to measuring the success of renewable assignments through outcomes assessment. **Musical Form, Forms & Formenlehre** William E. Caplin 2010 The tone of the debates among Caplin, Hepokoski, and Webster (in the form of comments on each author's essay and then responses to the comments), though tactful, is obliquely blunt and tendentious; like the best of tennis pros, each author strives to serve an ace and defends the net against a passing shot (with Caplin, the ace is for formal function; with Hepokoski for Sonata Theory and dialogic

form; with Webster for multivalent analysis). But we can trust that this provocative exchange will thoroughly invigorate discussions about classical form and encourage diverse approaches to its analys.
